

Brazilian wire, cable, tube and pipe trade shows wire South America and TUBOTECH will not take place until 2022

Brazil is still suffering badly from the consequences of the COVID 19 pandemic - there is no thought of opening prospects for trade fairs and other major events.

Therefore, the organizers of wire South America, Cipa Fiera Milano and Messe Düsseldorf, have decided to cancel the trade show for 2021 and postpone it to October 25-27, 2022.

The concurrent TUBOTECH, International Trade Fair for Tubes, Valves, Pumps, Fittings and Components, will also be postponed to this new date.

Originally, wire South America was to be held Oct. 5-7, 2021, at the Sao Paulo Expo Exhibition & Convention Center.

The Internet portals contain up-to-date information on both trade shows at: www.wire-south-america.com and www.tubotech-online.com.
